Learn iT!

Major Electronic Design Automation firm attends global training on Office 2007

"The unexpected thing is that people want more training and have approached me for future trainings." – Marjie, Sr. Technical Writer

Situation:

This organization is a world leader in delivering semiconductor design software, intellectual property (IP), design for manufacturing (DFM) solutions and professional services that companies use to design systems-on-chips (SoCs) and electronic systems. The company's products enable semiconductor, manufacturing, computer, communications, consumer electronics and other companies that develop electronic products to improve performance, increase productivity and achieve predictable success from systems to silicon.

Marjie, Sr. Technical Writer at the company, needed to find a learning solutions partner who would provide company-wide training on Office 2007 application suite for their global staff while remaining within the company's stringent budget.

Solution:

She had previous experiences with Learn iT! and wanted to bring them in to provide the training to staff at her company. Working with her Learn iT! team, Marjie created a customized curriculum, course schedule, and content delivery of the training sessions.

Over the course of 11 days Learn iT! instructors provided trainings in both lecture-style and WebEx format on Tips & Tricks for Office 2007 application suite, created video recordings, and provided hands-on training for participants with more advanced skills set in certain applications – all the while, remaining within the company's budgetary and time constraints.

Result:

Learn iT! was able to provide them customized, multi-day, multi-format Office 2007 training to over 250 staff members - while remaining budget and time conscious, meeting and exceeding their needs and expectations. While the training was not mandatory, Marjie feels it was a success as many participants approached to inquire about receiving additional training.

Overview:

Customer: Semiconductor Software Firm
Number of Employees: 5200+
Location: Mtn. View, CA
Industry: Electronic Design Automation
Solution: Office 2007 training for global audience
